

秀丽 II s型聚碳酸酯透气卷闸

秀丽 II s型卷闸帘页兼具透视、透气、美观、安防於一身。透气卷闸帘页具有节约能源的效能，也符合消防条例的要求；除此之外的，在一个中央空气调节的商场内，具透气功能的卷闸帘页至为重要，当卷闸关上后，帘页的透气功能可保持商店内外的空气流通，保持商铺货物气味清新。特别是位处商场的食品店、化妆品店、服装店在秀丽 II 型卷闸帘页的上方加入一至两行秀丽 II s型帘页是这些店铺的明智选择。

秀丽 II s型帘页亦可加入金属型材的格栅帘页，以增加帘页的透气量，符合某些特定的要求。

CS IIs polycarbonate ventilative roller shutter

Our CS IIs shutters are transparent, ventilative, elegant, solid and durable. Ventilative shutter slats are energy-saving, at the same time comply with fire requirements. Ventilation is rather important in a mall with central air-conditioning system. Air could flow in and out of the shops even when the shutters are closed. Adding a few lines of CS IIs slat on the top of CS II shutter is an excellent idea for catering shops, cosmetic shops and boutiques.

We can also add metal grille slats on our CS IIs slats, this will increase the airflow and suit your special needs.
