

General Description

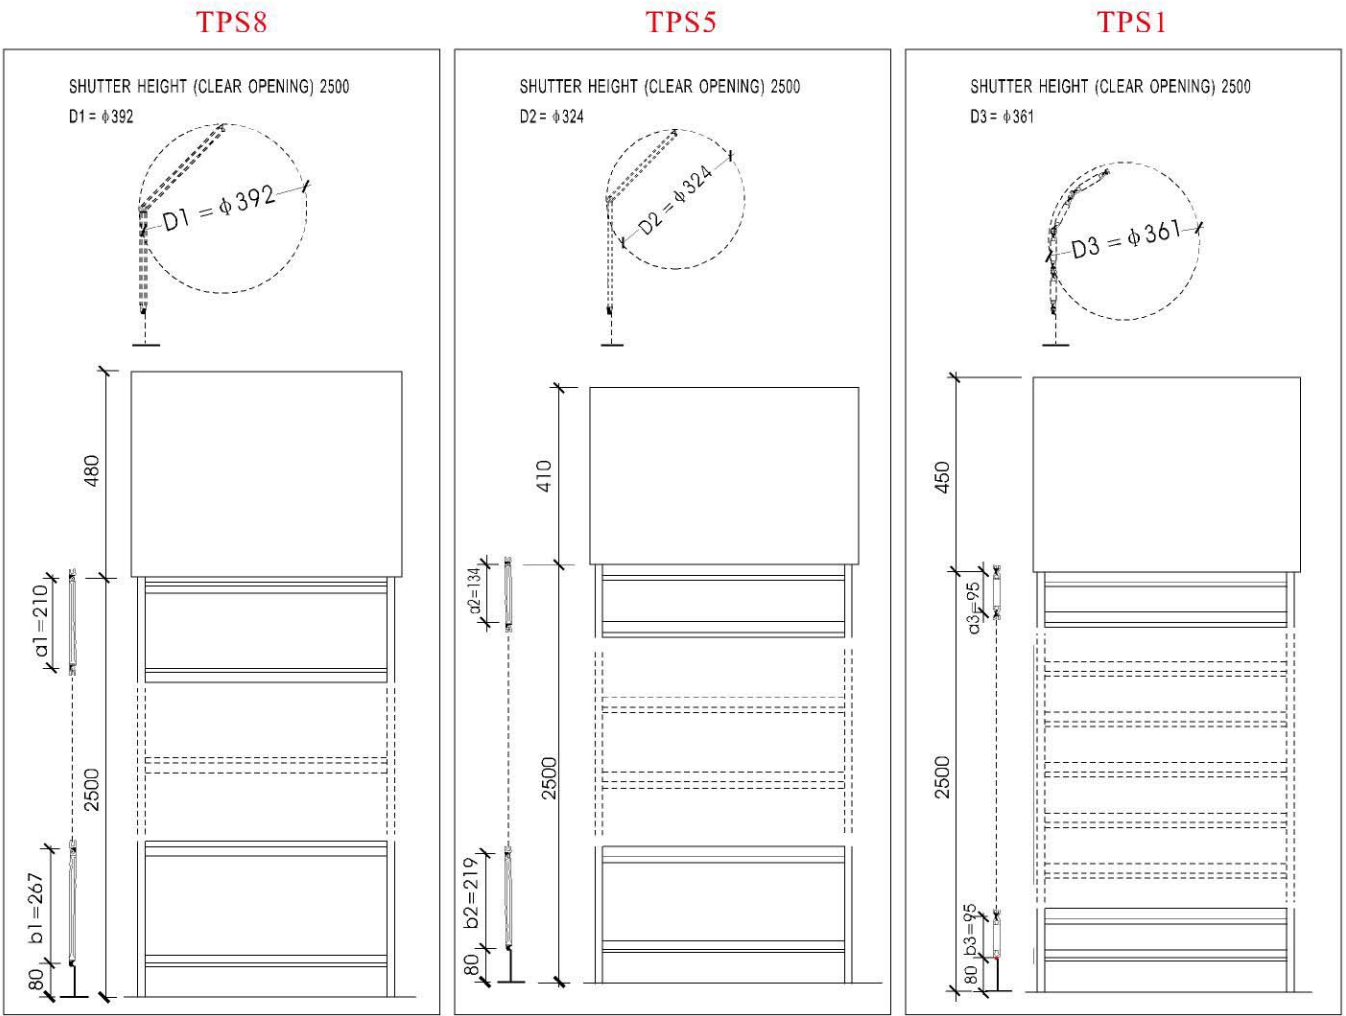

Our invention,Superfine Transparent Shutter is granted the funding support on patent application from Hong Kong Industry Department in September 1999.It is made of aluminium alloy and polycarbonate sheet. Its unique design provides the best solution for shops which requires both security and pleasant outlook.

Shutter Curtain Profile

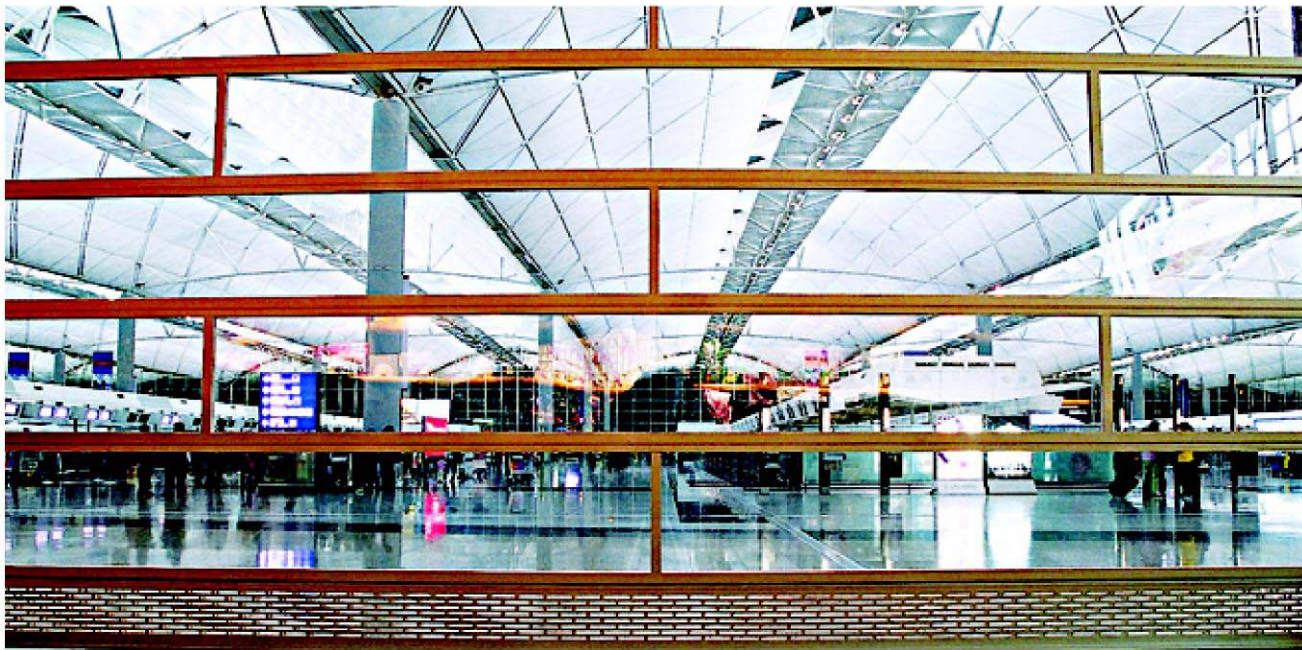

There are three different models of shutter curtain:

- TPS8 With the largest transparency percentage
 - Provides high level of visibility
 - Designed for both manual and electric operation mode
- TPS5 High transparency with smaller coil area
 - Designed for electric operation only
- TPS1 High level of durability
 - Consistent slats assembling structure provides maximum impact resistance
 - Support installation of typhoon post and wicket door
 - Designed for both manual and electric operation mode

The following sample shows the pitch of the slat,and also the coiled diameter when the height of the shutter is 2500mm

- Shutter curtain: • A set of transparent polycarbonate sheets inserted into an aluminium frame to form a continuous rolling curtain.
- Material : • Transparent polycarbonate sheet and aluminium frame.
 - Model No. : • TPS5
 - Size : • Width up to 12000mm and height up to 4000mm
 - Operation : • Electric operated (vertically sliding)
